

COMMON PEDESTRIAN INJURIES

When a driver hits someone walking, the damage isn't random. It hits the body in predictable, devastating ways. The pedestrian injuries shown here reflect how often each body part is injured in a crash. **Almost 40% of pedestrians hit by vehicles report injuries to multiple body regions.**

A serious pedestrian injury can change your life forever. **If you were hit by a car while walking, contact Armando Personal Injury Law. We know how to hold negligent drivers accountable and fight for maximum compensation.**
